7 March 1984

MEMORANDUM FOR THE RECORD

SUBJECT: Budget Briefing for SSCI Staffer

1. On 7 March 1984 Ed Levine, Senate Select Committee on Intelligence (SSCI) staffer, was briefed on NPIC upgrade, IDEX II and CAMS II, as arranged by the Office of Comptroller.

2. Levine was introduced to [redacted] new Director of the National Photographic Interpretation Center (NPIC). A twenty-minute videotape was shown detailing the NPIC upgrade. Levine's concerns were a) how are the analysts going to be informed on what is available so that they can develop their criteria and b) what is going to happen with the data deluge when the systems are fully operational.

3. The briefing on IDEX II was presented by OD&E. Levine asked what was done when it was discovered they were running out of money. Obviously this is a question that has been asked before since there was also a set of slides on what changes were made in the system.

4. Among those present for the CAMS II briefing were Mr. [redacted] Director of Data Processing; [redacted] Chairman, Committee on Imagery Requirements and Exploitation (COMIREX) and [redacted] Director of Development and Engineering. Following the actual briefing, Levine asked [redacted] for an update on several study groups that had previously been formed by COMIREX. A long discussion then ensued on what dissemination should be allowed on imagery. [redacted] did make reference to a paper which was done in 1976-77 when an imagery satellite was launched. Levine asked for a copy of this paper if a copy could be found.
